SKILLS

Languages: Java, HTML, CSS, JavaScript, C, SQL

Frameworks / Libraries: Bootstrap, Spring MVC, Spring Boot, REST APIs, Spring Data JPA, Spring Security, Hibernate, Lombok

Tools & Platforms: IntelliJ IDEA, Eclipse, Maven, Git, GitHub, GitLab, Postman

Development Practices: CI/CD, Design Patterns, Microservices Basics, Conventional Commits, MVC Architecture

COURSEWORK

Data Structures and Algorithms
Azure Fundamentals AZ-900 [Link]
Software Design - Architecture
Operating Systems
Object-Oriented Programming

COMMUNITY

Wipro Technical Member: Led multiple sessions on Java and DSA for community members, sharing practical coding knowledge and best practices.

Wipro TechFest Winner: Secured top honors among 500+ participants in a competitive programming contest. Solved complex challenges using Java, earning recognition from senior leadership for advanced problem-solving skills.

EXPERIENCE

WIPRO TECHNOLOGIES | PROJECT ENGINEER

2023 - 2025 | Bengaluru, Karnataka, India

- Designed and implemented **5+ scalable RESTful services** using **Spring Boot**, **Spring Security**, **JPA**, and **MySQL**, enhancing backend reliability and sustaining consistent throughput for core business capabilities.
- Improved API performance by **20%** by profiling slow database operations, applying optimized indexes, and restructuring queries to remove bottlenecks.
- Architected the persistence layer using **Spring Data JPA** and **Hibernate**, utilizing **Projections**, **Lazy Loading**, and **Batch Processing** to optimize memory usage for large datasets.
- Modernized the platform by migrating a **Monolithic system** into **Spring Boot Microservices**, increasing deployment agility and simplifying long-term maintenance.
- Elevated code quality by refactoring **legacy modules**, standardizing **reusable patterns**, and conducting peer reviews, resulting in cleaner, stable, and maintainable components.
- Partnered with cross-functional teams in **Agile sprints** to streamline feature delivery while performing **Root Cause Analysis (RCA)** on production incidents, minimizing downtime and ensuring system stability.

WIPRO TECHNOLOGIES | ASSOCIATE PROJECT ENGINEER

2022 - 2023 | Bengaluru, Karnataka, India

- Developed **REST endpoints** for customer and billing workflows using **Spring Boot**, applying robust validation logic to ensure data integrity across services.
- Strengthened platform security by integrating **JWT authentication** and **Role-Based Access Control (RBAC)** within the Spring Security framework, securing sensitive user data.
- Optimized data access layers by refining **Hibernate entity mappings** and **HQL queries**, improving database query execution speed by **25%** and reducing memory footprint for high-volume transactions.
- Authored comprehensive **Technical documentation** for API contracts and database schemas, accelerating onboarding and knowledge transfer for new developers.

INTERNSHIP

WIPRO TECHNOLOGIES | PROJECT INTERN

2021 - 2022 | Remote

- Completed a 3-month training program covering Java fundamentals, Spring Boot, SQL, and enterprise development standards.
- Developed a User Management module by building RESTful APIs using Spring Boot and MySQL, ensuring seamless data handling and retrieval under senior supervision.
- Wrote comprehensive unit tests using JUnit to validate business logic, ensuring application stability and minimizing bugs during development.
- Actively participated in code review sessions to refine logic, adhere to clean coding principles, and enhance software maintainability.
